# Product Description

Bullet hell

# Product Backlog

| Name | How to Demo | Notes |
|---|---|---|
| Player Character | User is able to move the player character with arrow keys. | A player character is visible on the screen and is movable using arrow keys. Player may not move off the screen. Player has a certain amount of hit points. |
| Game Over | User deliberately gets hit by enemy projectile until health is 0. | Game over screen is shown when player gets hit by an enemy projectile. Enemy projectile has to be distinguishable from player and removed when off screen. |
| Enemy | When starting the game, non-player characters should spawn naturally. | A non-player character is shown and is able to "shoot" projectiles. NPC should be distinguishable from player and projectiles, and be removed after exiting the screen.. |
| Scores | User plays game for a set amount of time. | Depending on how long the player survives, the score should go up. |
| Menu | User starts the application and is met by a menu. | When the user starts the application, it boots into a menu with a start button, a highscores button, and an exit button. |
| Player Projectiles | User aims their mouse towards a point within the window. When the player projectile hits an enemy character, enemy should be removed and the score updated. | Player's projectile should be distinct from all other entities and should be removed once off screen. |
| Increasing Difficulty | When the user plays the game, the amount of enemy characters and projectiles scales with their score. | Difficulty scales both the amount of enemies, their spawn rate and speed, and the amount of projectiles on screen until a maximum difficulty has been reached. |
| Scoreboard | User navigates to the scoreboard page. A list of previous highscores is visible. | High scores may be stored in plain text or any other format on the device in the project's subfolder. |
| Exit Button | User presses the exit button and the application closes. | — |
